## *School Library Review*

### *Firefighter George and Fire Engines Volume One      Start Smarter Videos*

*September 2003*

*With an enthusiastic delivery, Firefighter George introduces young children to fire safety and takes them on a tour of a fire truck. Fast moving fire trucks and a group of children called the "Start Smarter Junior Firefighters" add visual interest. In this 38 minute VHS video, children will see where the hoses are stored and how they are used, as well as various other compartments and features of the truck. They will see what happens when a 911 call is received. The video shows the firefighters getting dressed, climbing onto the truck and heading down the road. The safety feature explains where to go if there is a fire at home and how to get out of the way when the fire truck arrives. Lesson two presents what is contained in some of the compartments on the truck. Children will be caught up in the excitement of this close-up view of a fire truck.*
